

Minception participated in the 9th IME-2022 – International Mining, Equipment, Minerals & Metals Exhibition held at Kolkata during April 4-7, 2022. Visitors from across the mining value chain visited our stall and were eager to understand our offerings.

This has created an effective platform for us to showcase our team of global experts who carry collective operating and technical experience in exploration, cartography, GIS, mining, mineral processing, plant engineering, financial modelling, project evaluation & management, open innovation, value engineering, multi-modal logistics, and mineral sales & trading to the mining professionals, academicians, researchers, equipment manufacturers, and policymakers.

The event gave us an opportunity to have fruitful face-to-face interactions that led to meaningful deliberations on all the issues concerned.
